

# ANIMAL COMMUNICATION INTRODUCTORY COURSE

JULY 11, 2015

HOSTED BY ARAGON ALPACAS

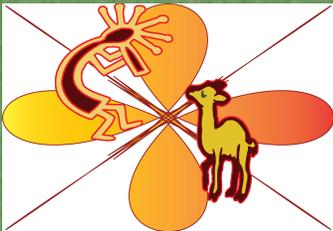

Wouldn't it be great to talk to animals like Dr. Doolittle?

- ☑ Learn how to calm a frightened animal, gain their trust and work with them in a gentle, respectful fashion.
- ☑ Learn simple techniques that work on alpacas and other animals.
- ☑ Learn you too can connect intuitively with your animals.
- ☑ No experience required! Everyone can learn to listen to animals!
- ☑ You will experience listening in a way that will stay in your heart forever.

Here is what someone had to say after Cindy performed intuitive work on their alpaca:

*Cindy's subtle mastery of communication with animals goes unnoticed unless you are paying close attention. I observed her at work with my critically ill alpaca, calming and soothing the animal without saying a word. As she quietly focused on the area of pain, the creature relaxed into steadier breathing patterns and so was able to take in whatever medicine or healing was needed. With Cindy's guidance, I was able to assist in ways I never knew were possible. There is in all of us the capacity for great communication beyond the dictionary and cell phone. Cindy is bold enough to listen and to speak with her mind and heart into that space that animals share with us.*

Cindy Myers - Animal Listener  
Author of *Alpacas Don't Do That*
